

Health Alliance Network

“healthcare simplified, for employers and groups”

Understanding Our Products

Our core product is healthcare delivered through our telemedicine provider network.

It is important to note, that unlike many of our competitors, our entire provider network is made up of **U.S. Board Certified Physicians** and we have **no co-pay**, no excess utilizations limits and **no up-charges**.

Best of all, our unlimited healthcare plan covers the entire household for \$14.99 per month and you speak directly to the doctor (no gate keeper).

Our Core Products Broken Down

Unlimited Medical Visits

With a nationwide network of 1000's of Doctors, visits are fast, convenient, effective and available 24/7 in all 50 states.

No application to fill out, and we never ask for private information such as a drivers license or social security number.

For most reasons that you would go to a Primary Care Doctor or even an Urgent Care Center you can use our doctors to diagnose health issues like cold and flu, allergies, rash, UTI, skin problems and so much more!

Unlimited Dermatology Visits

The only thing worse than suffering from a nagging skin issue is waiting for an appointment with a dermatologist, which in many areas of the country, can be weeks or months. At Health Alliance Network you can get a diagnosis and treatment plan quickly and easily anytime and from anywhere via your smart phone or computer.

Behavioral Health and Counseling

Visits are convenient, private, safe and secure. Protection of your personal information is our top priority. Speak to a professional on your schedule.

Unlimited Prescription Benefits

Need a prescription? Our physicians, dermatologist and counselors can send it to your local pharmacy electronically. Many common medications are free.

Electronic Medical Record | EMR

With our desktop and/or mobile App we offer an organized collection of your medical records that you are in control of. All of your records can be in one HIPAA compliant location that gives you 24/7 access.

Health Alliance Network solves these major barriers to health care

1. Eliminates the need for transportation
2. Gives immediate access to a doctor from virtually anywhere
3. Takes the guess work out of "how much is my doctors bill going to be"
4. Eliminates unnecessary employee absenteeism

"The US Department of Health and Human Services (HHS) plans to reduce patient transports to costly emergency departments by steering them toward telemedicine".. "Diverting patients away from emergency departments and toward telemedicine represents a massive savings". HHS September 2018
